Sew Nose to Head, stuffing lightly.

With face placed toward ankle opening, sew Head over rnds 9-19 on front of Slipper, stuffing before closing.

For **soft sculptured eyes**, with dk. brown, using satin stitch (see illustration), embroider eyes on each side of Nose. Insert needle threaded with dk. brown from one eye through front of head to second eye; make small stitch beside second eye, bring needle back through

to first eye; pull to tighten, tie end of yarn to secure. Fasten off.

Ear (make 2)

Rnd 1: With lt. gold, ch 2, 6 sc in second ch from hook. (6 sc made)

Rnd 2: 2 sc in each st around. (12)

Rnds 3-4: Sc in each st around. At end of last rnd, join with sl st in first sc, fasten off.

Flatten Ear; gather lightly across last rnd and sew to side of Head in front of mane (see photo). 🐾

Satin Stitch

For an invisible finish when hiding ends: Using a thin tapestry needle with a blunt tip, carefully weave the end through the back of several stitches, going first one way and then the next. Clip the thread close to the back and secure with a tiny drop of fabric glue.

Getting Started

Yarn & Hooks

Always use the weight of yarn specified in the pattern so you can be assured of achieving the proper gauge. It is best to purchase extra of each color needed to allow for differences in tension and dyes.

The hook size stated in the pattern is to be used as a guide. Always work a swatch of the stitch pattern with the suggested hook size. If you find your gauge is smaller or larger than what is specified, choose a different size hook.

Gauge

Gauge is measured by counting the number of rows or stitches per inch. Each of the patterns featured in this book will have a gauge listed. Gauge for some small motifs or flowers is given as an overall measurement. Proper gauge must be attained for the project to come out the size stated, and to prevent ruffling and puckering.

Make a swatch in the stitch indicated in the gauge section of the instructions. Lay the swatch flat and measure the stitches. If you have more stitches per inch than specified in the pattern, your gauge is too tight and you need a larger hook. Fewer stitches per inch indicates a gauge that is too loose. In this case, choose a smaller hook size. Next, check the number of rows. If necessary, adjust your row gauge slightly by pulling the loops down a little tighter on your hook, or by pulling the loops up slightly to extend them.

Once you've attained the proper gauge, you're ready to start your project. Remember to check your gauge periodically to avoid problems later.

Pattern Repeat Symbols

Written crochet instructions typically include symbols such as parentheses, asterisks and brackets. In some patterns a diamond or bullet (dot) may be added.

() Parentheses enclose instructions which are to be worked again later or the number of times indicated after the parentheses. For example, "(2 dc in next st, skip next st) 5 times" means to follow the instructions within the parentheses a total of five times. If no number appears after the parentheses, you will be instructed when to repeat further into the pattern. Parentheses may also be used to enclose a group of stitches which should

be worked in one space or stitch. For example, "(2 dc, ch 2, 2 dc) in next st" means to work all the stitches within the parentheses in the next stitch.

* Asterisks may be used alone or in pairs, usually in combination with parentheses. If used in pairs, the instructions enclosed within asterisks will be followed by instructions for repeating. These repeat instructions may appear later in the pattern or immediately after the last asterisk. For example, "*dc in next 4 sts, (2 dc, ch 2, 2 dc) in corner sp*, dc in next 4 sts; repeat between * 2 more times" means to work through the instructions up to the word "repeat," then repeat only the instructions that are enclosed within the asterisks twice.

If used alone an asterisk marks the beginning of instructions which are to be repeated. Work through the instructions from the beginning, then repeat only the portion after the * up to the word "repeat"; then follow any remaining instructions. If number of times is given, work through the instructions one time, repeat the number of times stated, then follow the remainder to the instructions.

[] Brackets, ♦ diamonds and • bullets are used in the same manner as asterisks. Follow the specific instructions given when repeating.

Finishing

Patterns that require assembly will suggest a tapestry needle in the materials. This should be a #10, #16 or #26 blunt-tipped tapestry needle. When stitching pieces together, be careful to keep the seams flat so pieces do not pucker.

Hiding loose ends is never a fun task, but if done correctly, may mean the difference between an item looking great for years or one that quickly shows signs of wear. Always leave 6-8" of yarn when beginning or ending. Thread the loose end into your tapestry needle and carefully weave through the back of several stitches. Then weave in the opposite direction, going through different strands. Gently pull the end and clip, allowing the end to pull up under the stitches. For thread or other specialty yarns that may be more slippery, a tiny drop of liquid fray preventer will help hold them more securely. Using matching color sewing thread to stitch the ends down also works well for color change projects with lots of yarn ends.
